على المترشح أن يختار أحد الموضوعين التاليين

الموضوع الأول

Part One: Reading

(15 points)

A) Comprehension

(07 points)

Read the text carefully then do the activities:

Athenians thought of themselves as the shining star of the Greek city-states. They were famous for their literature, poetry, drama, theatre, schools, buildings, and government. Before the Greek dark ages, Athens was a small village and developed rapidly until it became one of the two most powerful city-states in the ancient Greek world.

The Greeks believed that each city-state in ancient Greece had a god or a goddess in charge of it, their special patron. For Athens, the patron was Athena, goddess of wisdom. Perhaps because Athena was their patron, Athenians put a great deal of emphasis on education.

Girls learned at home from their mothers to run a home, and to be good wives and mothers. While boys were educated quite differently; until the age of 7, they were taught at home by their mothers then attended a day school outside the home from 7 to 14. There, they memorized Homeric poetry and learned to play the lyre. They learned drama, public speaking, reading, writing, math, and perhaps even how to play the flute. After middle-school, they went to a four year high-school and learned more about math, science, and government. At the age of 18, they attended two years of military school. This is why Athens was proud of its system of education.

The men of Athens met each week to discuss problems and work on solutions. For about 100 years, Athens was a direct democracy.

1. Circle the letter corresponding to the correct answer.

The text is about

- a) Life and education in Ancient Athens
- b) The Greek civilization
- c) Athens, the capital of Greece

Part 1. Reading  
A. Comprehension

(15pts)  
7 points

*Read the text carefully then do the activities.*

English children are required to be in full-time education between the ages of 5 and 16. Some receive their primary education at an infant school and then a junior school whereas others receive it at a primary school that combines both.

About 94 per cent of pupils in the UK receive free education from public funds, while 6 per cent attend independent fee-paying schools.

At the age of 11, they move on to regular high school, known as secondary schools. At the age of 16 students sit for an examination called the GCSE (General Certificate of Secondary Education). All students are tested in mathematics, English literature, English composition, chemistry, biology, physics, history or the Classics, one modern language, and one other subject, such as art or computer studies.

After completing the GCSE, some students leave school, others go onto technical college, whilst others continue at high school for two more years and take a further set of standardized exams, known as A levels, in three or four subjects. These exams determine whether a student is eligible for university.

\* whilst = while

1- Are the following statements true or false?

- All English children go to the same school.
- When children are 11, they move on to secondary schools
- English literature is one of the subjects students are tested in GCSE.
