Level: 1st year Literary Stream
Secondary School Duration: 1 hour
Name:
Third term test of English N°2
Read the text and do the activities.
The scanner is a machine, which can produce pictures of body tissues. The first scanner was produced by doctor God Frey Homsfield in 1972 .Now the scanner can give doctors more information about their patients and help them to make accurate diagnosis. This machine has a bed, a scanning unit, a computer control panel and a television screen. The scanner examines the body in pieces of thirteen millimetres thick .To make a picture of a complete pieces takes only twenty seconds .During this period there are 300.000 readings The computer receives all this information, processes it and makes a picture of the pieces which is seen on the screen .the information is then stored by the computer.
