Computer

Computer is a new automatic and electronic machine that it is used to help man in his work. Van Newman invented it in 1948.

It is one of the most important inventions of this century. It has a screen, a keyboard, a mouse, a headphone, etc. It contains five parts: Input, memory, arithmetic and logic, control and output.

Computer can write, play games, perform music and do drawings, etc. It can store and give information very quickly; it is able to do the work of hundreds of workers in a very short time.

Nowadays, computers are used in different places: Schools, universities, factories, hospitals and other public services and even at home; they make our life easier and better.

PART ONE: (14 PTS.)

Section O1: Reading comprehension. (07 Pts.)

A) Read the text carefully and answer these questions: (03 pts.)

- ① How many paragraphs are there in the text ?
