Text:

Food habits vary from one place to another around the world. Each community has its own ways of preparing it. The dishes we find in North Africa have very little in common with the ones served in England. These differences are due to many factors ; some of them are connected with geographical position of a country. As a result, the populations there don't develop in their culture cooking reaps integrating fish as a basic elements where there is no contact with the sea. The second aspect, the way they feed themselves is linked to the weather. The third element is connected with religion.

PART ONE:
